

Onyx 5 cp.

# ONYX™

**For regular hiking or at 5,300 metres**

Our intention with Onyx was a Nordic tipi for less ambitious purposes or when low weight is a priority. We managed to reduce the price considerably but our customers don't always think "less ambitious" – some use it in the most demanding circumstances. The unexpected functionality and durability means that even our basic model of Onyx is a very advanced tent.

# Key features

1

**Large smoke opening**  
Ensures efficient ventilation on warm days and smoke clearance when using a fire.

2

**Tent fabric**  
Strong, high-class fabric. Onyx is available in two model variants with different fabrics: cotton/polyester (cp) and light.

3

**Central pole**  
Five-piece hardened aluminium alloy pole.

4

**Door fitted with mosquito net**  
Improves ventilation. Diagonal zip with rain flap prevents water penetration.

5

**Storm cords**  
Storm cords with reflecting threads woven into the cords, supplied loose.

6

**Ground straps**  
Strong, adjustable ground straps are used instead of cords to tension the Nordic tipi.

7

**Ventilator cap**  
A simplified version of our patented In-Tent Vent system, with two opening points, controllable from inside the tent.

# Fabrics

## ONYX cp – Cotpolmex Comfort

Strong and well-ventilating cotton/polyester fabric which gives an indoor climate far superior to that of a tent made of any kind of coated fabric. The fabric has a natural feel and its beige-brown colour creates a warm, pleasant atmosphere in the Nordic tipi. Very durable and with good water-repellent properties. The colour of the fabric can quickly fade in the sun, but the material retains its good properties and is many times more resistant to sunlight than lightweight materials (regardless of make). Rot-protected. Approximately 275 g/m<sup>2</sup>.

## ONYX light – Traillix Base

A carefully chosen standard fabric. Non-ventilating, grey, lightweight polyamide fabric, ripstop reinforced and PU-coated on one side. Rainproof even after long-term use. Approximately 80 g/m<sup>2</sup>.

### Included

Ventilator cap, door with net, central pole, storm cords, measuring tape, mounting cross, packing bag and standard tent pegs.

### Floors and inner tents as accessories

We want our Nordic tipis to be as flexible as possible. That is why you can choose to supplement the outer tent with the different types of floors or inner tents that will best fit your needs. Visit [tentipi.com](http://tentipi.com)

### More accessories

Stove, fire boxes, porch, canopy, drying rail, etc. Visit [tentipi.com](http://tentipi.com)

Although Onyx 5 light is intended for less ambitious purposes, it was still the choice for Mike Fuchs' base camp at Lenin Peak, Pamir, 5,300 metres.

## Why choose a Nordic tipi from Tentipi?

### Easy to pitch in only a few minutes

Measure out eight pegs in a circle, attach the tent canvas and then raise the central pole. With our standardised method, you can't go wrong.

### You can use a fire or stove inside

Whether you prefer an open fire or a stove, our Nordic tipis' unique design enables fire-making for warmth and cosiness. Increases safety in cold conditions.

### Outstanding ventilation

Keeps you comfortable whether you camp in the Arctic or under a blazing sun in the desert. Mosquito-netted openings let you ventilate out hot air and smoke without getting insects in the tent.

### Very stable in strong winds

The symmetrical shape and low central gravity make our Nordic tipis more secure in high and gusty winds than most other tent designs.

### Space for socialising and plenty of headroom

Friends and family can socialise around the fire. You can get dressed in the morning without crawling around on the floor.

### Modular and flexible

You can use the outer tent on its own or add an optional floor or inner tent based on your needs. A Nordic tipi from Tentipi is comfortable, safe and highly versatile, with a low weight in relation to capacity.
