

Safirflex @ Elles Utemat,  
Elias Högnerg.

# SAFIRFLEX™

**Widened views – new horizons**

Safirflex is resistant to sunlight as regards strength and colour fastness and it has very good form stability and water repellency. Three large air intakes, each with a fitted mosquito net, are a standard feature. When all walls are raised, the 50 square metre covered area offers protection against the sun or rain. With some of the walls raised, you get shelter from the wind but you still feel close to nature and you can see what is going on outside the tent. In strong winds, all walls are lowered and then the tent can withstand just about anything.

# Key features

**1**

**Large smoke opening with mosquito-net ceiling**  
Ensures efficient ventilation on warm days and smoke clearance when using a fire.

**2**

**Tent fabric**  
Best quality fabric that puts Safirflex in a class of its own. Safirflex is available in two model variants with different fabrics: cotton/polyester (cp) and eco.

**3**

**Central pole**  
Five-piece hardened aluminium alloy pole.

**4**

**Door fitted with mosquito net**  
Improves ventilation. Diagonal zip with rain flap prevents water penetration.

**5**

**Storm cords**  
Pre-tied and fitted with holders, with reflecting threads woven into the cords. Storm cord holders allow cords to be in place ready for use, without tangling.

**6**

**Reinforced edging**  
50 centimetres high, for better wear resistance. Exposed parts of the tent walls are strengthened with strain-relief reinforcements.

**7**

**Ground straps**  
Strong, adjustable ground straps are used instead of cords to tension the Nordic tipi.

**8**

**Chimney opening**  
Versatile feature that allows the easy fitting of a stove.

**9**

**In-Tent Vent™ system**  
Allows maximum control of the tent's indoor climate using patented technology.

**10**

**Three large air intakes**  
Adjustable from inside the tent, each fitted with a mosquito net.

**11**

**Expansion panels**  
Enable the walls of the tent to be raised. Zips hide the expansion panels when they are not being used.

**12**

**Adjustable aluminium poles**  
Telescopic poles that keep the raised walls up.

# Fabric

## SAFIRFLEX cp – Cotpolmex Pro

Very strong and well-ventilating cotton/polyester fabric which gives an indoor climate far superior to that of a tent made of any kind of coated fabric. The beige-brown colour creates a warm, pleasant atmosphere in the Nordic tipi. The fabric is denser and more resistant to sunlight as regards strength and colour fastness than all corresponding fabrics tested. It has also better form stability and water repellency properties. With its high-class attributes, attractive appearance and natural feel, this is, as far as we know, the world's best cotton/polyester outer tent fabric. Approximately 285 g/m<sup>2</sup>.

## SAFIR eco – Environmex Pro

Unik blandning av hampa, ekologisk bomull och återvunnen polyester. Tester i krävande miljöer visar att ecoväven har enastående funktioner; hög hållfasthet, bra UV-beständighet, utmärkt stabilitet och goda vattenavvisande egenskaper. Kombinationen av dessa funktioner ger ett välventilerat och förstklassigt "inomhusklimat". 100 procent ekologiskt. Cirka 285 g/m<sup>2</sup>.

Flex tent with  
Half inner tent 15,  
Hekla 30 fire box and  
Hekla fire box stand.

## Why choose a Nordic tipi from Tentipi?

### Easy to pitch in only a few minutes

Measure out eight pegs in a circle, attach the tent canvas and then raise the central pole. With our standardised method, you can't go wrong.

### You can use a fire or stove inside

Whether you prefer an open fire or a stove, our Nordic tipis' unique design enables fire-making for warmth and cosiness. Increases safety in cold conditions.

### Outstanding ventilation

Keeps you comfortable whether you camp in the Arctic or under a blazing sun in the desert. Mosquito-netted openings let you ventilate out hot air and smoke without getting insects in the tent.

### Very stable in strong winds

The symmetrical shape and low central gravity make our Nordic tipis more secure in high and gusty winds than most other tent designs.

### Space for socialising and plenty of headroom

Friends and family can socialise around the fire. You can get dressed in the morning without crawling around on the floor.

### Modular and flexible

You can use the outer tent on its own or add an optional floor or inner tent based on your needs. A Nordic tipi from Tentipi is comfortable, safe and highly versatile, with a low weight in relation to capacity.
