

SafirFlex 9 cp.

# SAFIRFLEX™

**Widened views – new horizons**

SafirFlex is a true Safir tent – with raiseable walls. It retains all the strength, weather resistance and premium features of the Safir range. Raise two wall sections on size 9 for shelter with a view or create a breezy canopy by lifting all walls on size 15. When the weather turns or night falls, lower everything and enjoy full protection. From glamping and family camping to outdoor fairs and classrooms – this Nordic tipi adapts to your needs. Available in size 9 and 15.

# Key features

1

**Large smoke opening with mosquito-net ceiling**  
Ensures efficient ventilation on warm days and smoke clearance when using a fire.

2

**Tent fabric**  
Best quality fabric that puts SafirFlex in a class of its own. SafirFlex is available in two model variants with different fabrics: cotton/polyester (cp) and eco.

3

**Central pole**  
Five-piece hardened aluminium alloy pole.

4

**Door fitted with mosquito net**  
Improves ventilation. Diagonal zip with rain flap prevents water penetration.

5

**Storm cords**  
Pre-tied and fitted with holders, with reflecting threads woven into the cords. Storm cord holders allow cords to be in place ready for use, without tangling.

6

**Reinforced edging**  
50 centimetres high, for better wear resistance. Exposed parts of the tent walls are strengthened with strain-relief reinforcements.

7

**Ground straps**  
Strong, adjustable ground straps are used instead of cords to tension the Nordic tipi.

8

**Chimney opening**  
Versatile feature that allows the easy fitting of a stove.

9

**In-Tent Vent™ system**  
Allows maximum control of the tent's indoor climate using patented technology.

10

**Three large air intakes**  
Adjustable from inside the tent, each fitted with a mosquito net.

11

**Expansion panels**  
Enable the walls of the tent to be raised. Zips hide the expansion panels when they are not being used.

12

**Adjustable aluminium poles**  
Telescopic poles that keep the raised walls up.

## Floors and inner tents as accessories

We want our Nordic tipis to be as flexible as possible. That is why you can choose to supplement the outer tent with the different types of floors or inner tents that will best fit your needs. Visit [tentipi.com](http://tentipi.com)

## More accessories

Flex 360 kit, stove, fire box, canopy, porch, drying rail, reindeer hide etc. Visit [tentipi.com](http://tentipi.com)

With SafirFlex 15, you can raise all walls for a panoramic open-air experience, turning your tent into a spacious canopy covering up to 50 square metres. SafirFlex 9 providing the ability to raise two sections of the walls for a cosy, yet open connection to nature.

1. All walls lowered – as an ordinary Safir 9 or 15
2. Two sections raised – standard delivery for SafirFlex 9 cp and SafirFlex 15 cp and eco
3. All walls raised – supplement with Flex 360 kit. Only size 15

## Fabrics

### SAFIRFLEX cp – Cotpolmex Pro

Very strong and well-ventilating cotton/polyester fabric which gives an indoor climate far superior to that of a tent made of any kind of coated fabric. The beige-brown colour creates a warm, pleasant atmosphere in the Nordic tipi. The fabric is denser and more resistant to sunlight as regards strength and colour fastness than all corresponding fabrics tested. It has also better form stability and water repellency properties. With its high-class attributes, attractive appearance and natural feel, this is, as far as we know, the world's best cotton/polyester outer tent fabric. Approximately 285 g/m<sup>2</sup>.

### SAFIRFLEX eco – Environmex Pro

Unique and sustainable fabric with a blend of hemp, organic cotton and recycled polyester. Tests in demanding environments show that the eco-fabric has outstanding features; high strength, good UV resistance, excellent stability and good water-repellent properties. The combination of these features provides a well-ventilated and first-class "indoor climate". 100 percent organic. Approximately 285 g/m<sup>2</sup>.

SafirFlex 15 cp

## Why choose a Nordic tipi from Tentipi?

### Easy to pitch in only a few minutes

Measure out eight pegs in a circle, attach the tent canvas and then raise the central pole. With our standardised method, you can't go wrong.

### You can use a fire or stove inside

Whether you prefer an open fire or a stove, our Nordic tipis' unique design enables fire-making for warmth and cosiness. Increases safety in cold conditions.

### Outstanding ventilation

Keeps you comfortable whether you camp in the Arctic or under a blazing sun in the desert. Mosquito-netted openings let you ventilate out hot air and smoke without getting insects in the tent.

### Very stable in strong winds

The symmetrical shape and low central gravity make our Nordic tipis more secure in high and gusty winds than most other tent designs.

### Space for socialising and plenty of headroom

Friends and family can socialise around the fire. You can get dressed in the morning without crawling around on the floor.

### Modular and flexible

You can use the outer tent on its own or add an optional floor or inner tent based on your needs. A Nordic tipi from Tentipi is comfortable, safe and highly versatile, with a low weight in relation to capacity.
