

Zirkonflex with
Half inner tent 15.

ZIRKONFLEX™

Open up for even more

Like our popular Zirkon 15 cp in all respects and also functions as a communal tent with optimal protection in all kinds of weather. When all walls are raised, the 50 square metre covered area offers protection against the sun or rain. With some of the walls raised, you get shelter from the wind but you still feel close to nature and you can see what is going on outside the tent. In strong winds, all walls are lowered and then the tent can withstand just about anything.

Key features

1

Large smoke opening with mosquito-net ceiling
Ensures efficient ventilation on warm days and smoke clearance when using a fire.

2

Tent fabric
Strong, high-class fabric. Zirkonflex is available in cotton/polyester (cp).

3

Central pole
Five-piece hardened aluminium alloy pole.

4

Door fitted with mosquito net
Improves ventilation. Diagonal zip with rain flap prevents water penetration.

5

Storm cords
Pre-tied and fitted with holders, with reflecting threads woven into the cords. Storm cord holders allow cords to be in place ready for use, without tangling.

6

Reinforced edging
50 centimetres high, for better wear resistance. Exposed parts of the tent walls are strengthened with strain-relief reinforcements.

7

Ground straps
Strong, adjustable ground straps are used instead of cords to tension the Nordic tipi.

8

Chimney opening
Versatile feature that allows the easy fitting of a stove.

9

In-Tent Vent™ system
Allows maximum control of the tent's indoor climate using patented technology.

10

One large air intake
Adjustable from inside the tent, fitted with a mosquito net.

11

Expansion panels
Enable the walls of the tent to be raised. Zips hide the expansion panels when they are not being used.

12

Adjustable aluminium poles
Telescopic poles that keep the raised walls up.

Fabric

ZIRKONFLEX cp – Cotpolmex Comfort

Strong and well-ventilating cotton/polyester fabric which gives an indoor climate far superior to that of a tent made of any kind of coated fabric. The fabric has a natural feel and its beige-brown colour creates a warm, pleasant

atmosphere in the Nordic tipi. Fades rapidly in the sun but without losing strength. Mildew prevention. Approximately 275 g/m².

Zirkonflex with
Half inner tent 15.

Why choose a Nordic tipi from Tentipi?

Easy to pitch in only a few minutes

Measure out eight pegs in a circle, attach the tent canvas and then raise the central pole. With our standardised method, you can't go wrong.

You can use a fire or stove inside

Whether you prefer an open fire or a stove, our Nordic tipis' unique design enables fire-making for warmth and cosiness. Increases safety in cold conditions.

Outstanding ventilation

Keeps you comfortable whether you camp in the Arctic or under a blazing sun in the desert. Mosquito-netted openings let you ventilate out hot air and smoke without getting insects in the tent.

Very stable in strong winds

The symmetrical shape and low central gravity make our Nordic tipis more secure in high and gusty winds than most other tent designs.

Space for socialising and plenty of headroom

Friends and family can socialise around the fire. You can get dressed in the morning without crawling around on the floor.

Modular and flexible

You can use the outer tent on its own or add an optional floor or inner tent based on your needs. A Nordic tipi from Tentipi is comfortable, safe and highly versatile, with a low weight in relation to capacity.
